(54) Title: SYSTEM AND METHOD FOR LOCALIZING SPORTS EQUIPMENT

(57) Abstract: When playing a sport it is generally difficult to localize (exactly) an accessory required for that sport at a determined point in time. The localizing of sports equipment may however be desired in particular situations, for instance to track down lost articles of sports equipment, or to be able to apply the rules of a sport in efficient manner. The invention therefore relates to a system for localizing sports equipment. The invention also relates to a method for localizing sports equipment using such a system.
